There is simply no preset effect for "style" -- it's a free effect. The keyboard settings will control the effect's parameters. I don't know if you can define custom settings, but if not, these settings should be the defaults: Preset #1 = Stereo Preset #2 = Mono Sustain = 14 Delay = .3 Feedback = 100 Compression = 10 You could also try using the chorus feature as a free effect. They aren't actually called "chorus" but that's the closest thing I found that is free. Seth Rogen and Paul Rudd are reuniting in "The Return of the King," the third installment of "The Lord of the Rings" trilogy, Sony Pictures announced Tuesday. The comedy-drama project centers on the formation of "The Fellowship of the Ring" and the friendship between Frodo and Sam. Anthony Hopkins, Elijah Wood and Ian McKellen are also set to star. Rogen and Rudd will play Sam and Frodo, respectively, and the film is being produced by Sam Raimi, Robert Rodriguez, Rob Coleman, and Bruce A. Taylor, with Sam Raimi and Charles Roven producing. "I'm incredibly excited about 'The Return of the King,'" Raimi said in a statement. "The hardest part about 'Spider-Man' was writing a sequel; when you've written the story, and you're now looking at how to tell it, the hardest part is trying to keep it fresh. I'm very excited to once again be working with Rogen, and I can't wait to see what he and Paul come up with in this story." Rudd added: "I am thrilled to be working with Mr. Raimi and his team again on this film. I look forward to producing 'The Return of the King' because this will be a joyous time." No release date has been announced. "The Return of the King" is the f678ea9f9e
